JOB OPENING

Remote Data Annotation Specialist

Work from Home – Get Trained & Join Our Talent Pool for Data Annotation!

Are you looking for a **flexible, remote opportunity** to earn money while working on AI-driven projects? We're building a talent pool of skilled data annotators, and you can be part of it!

What is Data Annotation?

Data annotation is the process of labeling data (such as images, videos, and text) to train AI models. It's a growing field with increasing demand for skilled annotators.

How It Works:

✅ **Step 1:** We provide you with free training materials to help you learn the basics of data annotation.

✅ **Step 2:** Once you complete the training, you'll be added to our talent pool.

✅ **Step 3:** When a paid project matches your skills, we'll contact you with details on compensation and contract terms.

Why Join?

- **Gain valuable skills –** Learn how to work in AI-driven industries.
- **Work remotely –** Flexible work hours, work from anywhere.
- **No prior experience needed –** Just a willingness to learn!
- **Earn money on projects –** Get paid for real work after training.

FAQs:

- **Will I be paid during training?** No, training is unpaid, but it's free and helps you build the skills needed to qualify for paid projects.
- **Is there an interview?** No formal interview. Your training completion and performance will determine your eligibility for projects.
- **What are the work hours?** Work hours depend on the project, but most roles are flexible.
- **When do I get paid?** Once assigned to a project, we'll discuss payment details.
